INDEX

SECTION 1
NYLES V. REINFELD
Mathematical Programming For Industrial Engineers 1

SECTION 2
A. C. NESSE
Systems For Management Control And New Tools For Management Control 33

SECTION 3
STANLEY T. WEBER
Budgeting Techniques 51

SECTION 4
E. F. SCOUTTEN
Labor Negotiations - Unions And Wage Incentives 55

SECTION 5
MYRON S. CURTIS
Numerical Controls - Economics And Uses 71

SECTION 6
D. G. MALCOLM
Pert - Automated R and D Management Information System 75

SECTION 7
RAY R. EPPERT
Storm Signals Of The Sixties 91

SECTION 8
JOHN C. DEAN
Budgeting for Research and Engineering Costs 99

SECTION 9
W. D. GEIST
Numerical Controls - Types And Functions 103

SECTION 10
Staff of CLARK EQUIPMENT COMPANY
Advanced Material Handling Techniques 109

SECTION 11
JOHN M. McBRIDE
Budgetary Controls Of Direct And Indirect Labor 113

SECTION 12
JOHN P. BUNCE
Industrial Engineering Functions In Integrating Numerical Control 117

SECTION 13
JEROME PEARLMAN
Estimating Analysis—Cost Engineering Approach 121

SECTION 14
JAMES H. GOSS
The Effect of Foreign Competition on United States Industry 129
